

Parking lot USB exercise

Contents	<p>Write 2-3 sentences about the types of information found on this device.</p> <p><i>The contents of the drive contain both PII and SPII contents. This includes contact information in his resume and sensitive work related files like Employee budgets and schedules. It is not safe to mix personal files with work files as attackers now have a clear target and connection to the company.</i></p>
Attacker mindset	<p>Write 2-3 sentences about how this information could be used against Jorge or the hospital.</p> <p><i>Because the drive contains a shift schedule for the company Jorge works at, the attacker could use listed names or emails to impersonate them and send malicious emails for Jorge or any of the other listed employees to click on. Jorge's resume also may list companies he worked on previously, which could be used later on if the attacker were to get Jorge's password.</i></p>
Risk analysis	<p>Write 3 or 4 sentences describing technical, operational, or managerial controls that could mitigate these types of attacks:</p> <p><i>A technical control that could help would be to educate employees on how to spot and what to do with suspiciously left out USB hard drives. An operational control would be running malware scans periodically to ensure nothing other than company resources are downloaded. Finally, a managerial control could be to prevent the computer from automatically installing contents from unknown sources. It should pause, scan for malware, and confirm that the contents is safe to open.</i></p>
